SUMMER SCHOOL TO BE HELD HERE CHRISTIAN CHURCH REVIVAL MAY CLOSE WEDNESDAY

At a meeting of the committee on university extension, University of Kentucky, arrangements formally were approved by the committee whereby a summer school will be held at Paris for five weeks, beginning yesterday, to be conducted under the auspices of the University of Kentucky. Professor Wellington Patrick, director of university extension, was authorized to carry into execution the plans for the work.

The teachers of Bourbon county, Paris, Millersburg and other towns in the county, are far above the average in educational attainment, and very few of them have done their part of their college work. For this reason it has been planned to deviate from the regular summer school program and the college work for the teachers of that county.

The following persons will constitute the faculty: Superintendent J. W. Lancaster, of Bourbon county high school, is to be principal of the school and will direct the work. Professor Mary Frances Jewell, of the department of English at the University of Kentucky, will give courses in English; Professor J. C. Jones, of the University, will give courses in history and government; Miss Nanie G. Clark, of Millersburg, will conduct courses in primary work and Miss Edith Stivers, of the Paris High School, will conduct some work in science and physiology. About half of the work will be of high school grade and the rest will be college work.

Superintendent Lee Kirkpatrick, of the Paris city school, was active in organizing the work, and was requested to accept a place on the faculty by the University authorities, but he declined to do so, as he had other engagements that will prevent.

This is a new venture for the department of university extension, and the modification of the summer school program as outlined by Superintendent Colvin is a matter that will be watched. The plans for the work will have to be approved by Superintendent Colvin before the work can be credited.

HELD TO GRAND JURY

Dillard Grant, colored, charged with housebreaking in having forcibly entered three business houses in Millersburg several weeks ago, was given his examining trial Friday afternoon by Acting Judge E. M. Thomason. Following submission of evidence in the case he was held to the grand jury in the sum of \$500. Being unable to furnish the bond he was remanded to the custody of Jailer Thos. Taul.

SCHOOL NOTES

At the close of the Sunday night service there had been 189 additions to the church at the Kellums-Richards revival.

At both services Sunday the church was filled to overflowing, and at the Sunday night service many were turned away. The meeting is now in its fourth week, and there has been a large outpouring at every service and this without the semblance of sensationalism. Every sermon that Rev. Kellums has delivered has been along strictly doctrinal lines, but the interest of his hearers has never for one minute lessened. A remarkable feature of this revival is that at only one service has there been no additions.

The sermon Sunday evening on "Christian Union" was one of sledge hammer arguments and was the most convincing one ever delivered in Paris, showing the fallacy and extravagance of Christian division, but was delivered in all fairness and kindness, and it would be an extremely sensitive person who could take offense. The preacher contended only for the church as it was in the time of the Apostles, and his aim was to show by the Bible that there was not only no necessity, but if was wrong to either add to or take from the teachings as laid by the Holy Writ.

To-night music will be furnished by the Male Chorus under the direction of Mr. Boatright. Every one is cordially invited.

The congregational singing is as enthusiastic and whole-hearted, and even more so, than at any time during the meeting.

The subject to-night will be, "Three Answers to The Same Question;" Wednesday night, "The Un-pardonable Sin."

Wednesday night will in all probability be the last of the meeting.

The Kellums party goes to Georgetown from Paris, and will hold a meeting in Lexington in October.

Rev. Kellums stated in his advance talk Sunday evening that he was dated up four years in advance.

If you are missing these sermons you are the loser, as they are some of the most remarkable ever heard. Come and bring some one with you.

SUNDAY AUTOMOBILE COLLISION HURTS TWO

The Bourbon County Public School commencement will be held in the Paris City School Auditorium on Wednesday, June 8, at 10:00 a. m. At this time one hundred and thirty-seven Bourbon County boys and girls will receive diplomas. Hon. George C. Colvin, of Frankfort, will deliver the address. Prof. J. Wilbur Lancaster, of Millersburg, will deliver the diplomas. Kidd's Orchestra, of Lexington, will furnish the music. At this commencement the County Board of Education and the City Board of Education, the members of the Bourbon county summer schools, the Bourbon county teachers and the parents of the graduates will occupy seats especially reserved for them. This is by far the largest number of public school graduates ever graduated at one time from the Bourbon county schools, and perhaps the largest ever graduated at one time from the public schools of any county in the State. We are especially proud of this achievement, and we feel sure Bourbon county is proud of it. Be sure to attend this commencement.

The Paris High School Commencement exercises will be held in the Christian church, June 9th, at 10 o'clock. Rev. C. H. Greer, pastor of the Paris Methodist church, will deliver the class address, at which time the following students will receive diplomas and certificates:

Fern Stone, Josephine Fitthian, Ann R. Duncan, Eva Chappell, Loraine Weathers, Frances Kenney, Nancy Young, Milton Darnell, Louise Letton, Amelia Morrison, Mary Frances Campbell, Hedgina Taylor, Souls Davis, Petes Helburn, Elizabeth Deaver, Lucinda Patton, Lillian Mitchell, Miriam Galloway, Louise Keal, Ussery Wilder, James Miller Dundon, Cletis Evans, James McClinton, Collins Hall, Claiborne Lisle, Norbert Friedman, Raymond Stamer, Morris Price.

The Bourbon county Summer School opened yesterday in the City School building at Paris. A five-weeks' summer session for children of the first eight grades began. This school is open to any child in Paris or Bourbon county who properly belongs to the first eight grades. The school will be in session one hour, a day, from ten to eleven, and will be used as practice teaching school for the summer training school. The school is under the direction of the State University. Parents will please call at the Public City School office and make arrangements if they want their children to attend this session. No tuition will be charged, and it will be a splendid opportunity for children who are weak in some subjects to make it up.

At a meeting of the County Board of Education held yesterday Prof. J. Moler McVey, former attorney of Paris, and one of the foremost educators of the State, was elected to fill the position of Superintendent of the Bourbon County Schools. Prof. McVey is a native of Bourbon county, a graduate of Transylvania College and took post-graduate work at the University of Virginia. He was until recently principal of the public schools in Dayton, Ky., and has for the past fifteen years been engaged in advanced educational work. Prof. McVey married Miss Terrill, daughter of Robert M. Terrill, of near Clintonville. He is a man of the highest character and eminently qualified for the position to which he has been elected.

Miss Cornell, of State University of Kentucky, spent Saturday here inspecting the laboratories and arranging with the school the courses for next year. Miss Cornell is the head of the department of Home Economics offered in the South. Miss Catherine Christian, who has assisted in the department in State University, has been selected to teach this work in Paris next year.

During the year that has just closed the Commercial Department of the Paris High School has tried to serve the public in a larger way than in previous years. This year we offered work to students who were not in school and who were not of school age. Fifteen young men and women of this city and county took advantage of this work this year and we are glad to have them. We are glad to make what contribution we could to the adult population of the city and county.

Superintendent Lee Kirkpatrick requests parents whose children failed in one or two subjects during the past term of school to urge their children to study on those subjects during the summer months, and try to make the necessary grade at the beginning of school in September. The custom of cross grading is very annoying to teachers and pupils as well, and should be avoided where possible. With a few hours of study each week the work can be accomplished.

Commencement exercises of the Western High School, colored, were held, beginning with the baccalaureate sermon Sunday morning. Yesterday was Patrons' Day. The commencement exercises proper will be held Friday at the Grand Opera House. The address will be delivered by Col. Roscoe Simmons, the noted colored orator, of Chicago.

The ninety-eighth annual commencement of Centre College will be held in Danville Wednesday morning, in the College Chapel. Twenty undergraduates will receive the degrees that make them alumni, and three honorary degrees will be conferred. The degree of Bachelor of Arts will be conferred on Edwin Kerr Thomas, son of Hon. Claude M. Thomas, of Paris. Dr. W. A. Gantfield, president of the College, will preside over the ceremonies.

SECRETARY HACKER EXPLAINS COMMERCIAL CLUB PLANS

As the result of a collision between two automobiles on the Peacock pike, near Currentsville, a few miles from Paris, Sunday morning, Mrs. George Rankin, of Shawhan, is confined in the Massie Memorial Hospital, with a broken arm, and her husband, Dr. George L. Rankin, sustained a badly cut leg, and bruises about the body.

The automobile in which Dr. and Mrs. Rankin were riding collided Sunday morning at a point near the home of George Current with a machine driven by R. C. Ruggles, of the Ruggles Motor Co., of Paris, who was accompanied by Mrs. Ruggles, and Mrs. Elizabeth Moore, of this city. None of the parties in the Ruggles machine were injured, but were badly shaken up. Their machine was badly damaged by the force of the collision, the Rankin machine escaping with a broken windshield and a bent fender. Both machines were brought in for repairs. The accident occurred at a point where there is a very sharp curve, the machines pitching in each other almost before their drivers discovered the presence of the other. Dr. and Mrs. Rankin, who were coming to Paris, were the only occupants of their car.

The George W. Davis ambulance was summoned and brought Dr. and Mrs. Rankin to the Massie Memorial Hospital, in this city, where the extent of their injuries was determined by physicians. Dr. Rankin is able to be out on crutches, but Mrs. Rankin will remain at the institution for some time. That no one was killed is a miracle, the two cars coming together with such force that Mrs. Rankin was thrown some distance.

JUDGE ERNEST MARTIN FOR POLICE JUDGE

In this issue of THE NEWS appears the official announcement of Judge Ernest L. Martin, of Paris, for re-election to the office of Police Judge, which position he has held for the past four years, and which he has filled in a most thorough manner.

Judge Martin is serving his fourth year as Police Judge of the City of Paris, and during his administration he has proven a fearless and impartial official, dealing justly, yet firmly, with all those who were brought before him on law violations.

Quite a number of Paris Democrats, admirers of Judge Martin, had importuned him to seek a higher office at the coming August primary election, but Judge Martin feels that he can better serve the people of Paris as their Police Judge at this time, and he is actively seeking the Democratic nomination for Police Judge.

Judge Martin has always been on the firing line in the battles for Democracy in the city, county and State campaigns, and has proven himself thoroughly capable and competent. He is well-known to the voters of the city, where he has been engaged in business for many years, and his record in office is one of which he is proud.

In presenting his candidacy for Police Judge, Mr. Martin does so with a distinct sense of his merits and asks the support of the Democrats of the city. (adv)

THOUGHT HE HAD 'EM

The surprise of her life greeted Mrs. William Ryan, wife of a Bourbon county farmer, the other day, when she opened a sack of bananas. While in Paris making a purchase of supplies, Mr. Ryan bought a half-dozen bananas, which were placed in a sack by the dealer. On arriving home Mr. Ryan and wife partook of the fruit and placed the peelings in the sack. The next morning Mrs. Ryan picked up the sack preparatory to emptying the contents into a garbage can, when a large tarantula sprang out and fastened on her hand. Before medical attention arrived her hand was badly swollen from the poison, but her family physician now considers her out of danger. The poison was killed.

Miss Cornell, of State University of Kentucky, spent Saturday here inspecting the laboratories and arranging with the school the courses for next year. Miss Cornell is the head of the department of Home Economics offered in the South. Miss Catherine Christian, who has assisted in the department in State University, has been selected to teach this work in Paris next year.

RETAIL CLOTHIERS IN SESSION AT LOUISVILLE

J. Withers Davis, second vice-president of the Kentucky Retail Clothiers' Association, will be unable to attend the opening session of the Association in Louisville, which begins to-day, being retained at home by business matters.

The convention of the clothiers originally was scheduled to be held on June 14 and 15, but because of the annual convention of the Travelers' Protective Association opening on June 14 the late was changed.

Clothing retailers deny the charges made that they have not taken their loss, and marked merchandise at lower prices. This subject will be given careful attention at this meeting. Addresses will be made by a number of men prominent in the clothing business in the State and in other States.

The Kentucky Association has about 75 members. The officers are Ellis Malone, Franklin, president; W. C. Fisher, Lexington, first vice-president; Withers Davis, Paris, second vice-president; A. L. Harbin, Shelbyville, treasurer, and L. G. Boone, Elkhorn, secretary.

POPULAR DICK STOLL NOW CIRCUIT JUDGE

Popular "Dick" Stoll, of Lexington, was appointed Circuit Judge of Fayette county by Gov. Morrow upon the resignation of Judge Chas. Kerr, who goes to the Federal bench of the Panama Canal Zone.

Judge Stoll has been acting Circuit Judge in Lexington for some time, due to the illness of Judge Kerr, and has given general satisfaction, presiding over the Court with ease and dignity. Of course, a Democrat will be elected to fill the vacancy, but if a Republican should happen to squeeze in, the many friends of Mr. Stoll, like to see him made the lucky man.

RAISE CEMETERY FUND

At a meeting in Carlisle called by Charles H. Peterson, of Paris, of relatives of persons buried in Mt. Nearly one thousand people attended the meeting, which was presided over by Mr. Peterson.

EDITORIAL FLINGS OF THIS. THAT 'EN 'TOTHER

An old-time pastime was a walking tour, a book carried and read along the road. The only book suitable for such reading in this age of motor vehicles would be "Spiritual Consolation For Those About To Die." For the danger of death would be ever present for anyone who would walk along the road now reading a book.

The horses have been removed to "fair Latonia," but still the last word has not been said on the betting instinct in man, the born gambler. Now, a Paris man comes forward with this one: "Our frivolous weather makes the confirmed gambler regret that he cannot trade in it. If it was only possible to go short on "Temptation Common" at 85 on Wednesday and close out at 53 on Thursday."

Origin of Widow's Caps. Widows wore caps, says one authority, at the time of the Roman conquest of England, because they shaved their heads as a sign of mourning; as woman would not allow herself to be seen with a bald head, she made herself a pretty cap. Though the necessity for it has long since passed away, the cap still remains. Why do we wear heels on our shoes? Because the sandal-like footwear of olden times was not adapted to horseback riding, and when the high boots were introduced heels were put on for the purpose of giving the foot a good hold on the stirrup.

Smoke as a Lightning Rod. It would seem that a building 8,000 feet above the sea level should be protected by lightning rods, but the astronomical observatory at Mount Mauna has not, and does not, need such protection. The observatory is near the summit of the volcano, and the stream of vapor constantly rising from the crater acts as a natural conductor, draining the electricity out of the clouds, so that lightning is seldom seen there.

Preserving Milk. Is milk condensed? Milk is condensed by the evaporation of the water it contains, after it has been sterilized. Sugar is added to some brands, and is not added to others, and the unsweetened is known as "evaporated" milk to distinguish it from the sweetened. Copper tanks holding 1,000 gallons or more are used in the sterilization of the milk, and the water is evaporated in huge vacuum pans.

The Savior in Profane History. Among the historical references to Jesus Christ which are undisputed is that made by Tacitus, the Roman historian, who on speaking of the Christians said, "The originator of that name had been executed in the reign of Tiberius by order of the administrator, Pontius Pilate." This may be found in the Annals of Terevatis. Reference to Christ is also made in the "Antiquities of Josephus," a Jewish historian, who was contemporary with Christ, but this passage is declared by some to be a forgery.

KEEP KIDNEYS WELL

Health Is Worth Saving, and Some Paris People Know How to Save It.

Many Paris people take their lives in their hands by neglecting the kidneys when they know these organs need help. Weak kidneys are responsible for a vast amount of suffering and ill health—the slightest delay is dangerous. Use Doan's Kidney Pills—a remedy that has helped thousands of kidney sufferers. Here is a Paris citizen's recommendation.

Geo. McCandless, Second street, gave the following statement January 17, 1912: "It is sometime since I have had occasion to take Doan's Kidney Pills. When I have used Doan's they gave me complete relief, which has proven permanent. My kidneys were inactive and I had backaches. The use of Doan's Kidney Pills put a stop to all the trouble."

On November 12, 1920, Mr. McCandless said: "I don't know of any remedy I can recommend more highly than Doan's Kidney Pills—the same that Mr. McCandless had. Foster-Milburn Co., Mfrs., Buffalo, N. Y. (adv.)

NOISY MOTORCYCLES ARE UNNECESSARY

The noisy motorcycle is officially taboo. There never was any legitimate need for a rider to travel with his machine, especially within the limits of any city or town, with his muffler open, thereby causing the motor to emit a stream of roaring explosions into the atmosphere.

It has been proved time and again that there is no appreciable loss of power under all normal conditions if the exhaust of the motor is muffed—in other words, if the muffler is kept closed.

The results just announced of a series of tests made by a prominent motorcycle manufacturer still further substantiates this contention.

Comparative tests of motor efficiency of motors with muffled and unblended exhausts were made under all conditions of load and speed.

The engineers who supervise the tests issued the statement that under normal conditions there is no material loss in motor efficiency. Motorcycles are designed and built to run smoothly and quietly. Wherever the "noisy" motorcycle appears it may be assumed that the operator is at fault. He has a false conception of the use of the open muffler, or else it is plain indifference that causes him to indulge in this motorizing evil.

ENTRY BLANKS FOR FALL TROT-

TING MEET

Entry blanks for the forty-ninth annual meeting of the Kentucky Trotting Horse Breeders' Association, October 3-15, are being distributed, giving conditions for the nine early closing events, which are closed June 1, and the two divisions of the Kentucky Futurity on which payments on horses to race this year are to be made. Of the early closers, six are for trotters and three for pacers. The trotting events are worth \$18,000, those for pacers \$7,000, making \$25,000, while with the two divisions of the Kentucky Futurity at \$21,000, gives the total stake money for the season at \$46,000.

This, with the 30 purse races to close in September, will give a total program of about \$85,000 for the ten days' meeting. To date the association has paid to horsemen \$2,558,780 in the 48 years of its existence.

One feature of the meeting this year is the change in conditions of the races, each and all of which will be decided on the 2-in-3 heat plan. President Tipton, of the association, said the main reason for so doing was to give every stake horse a chance to start three times during the meeting, if their owners so desired. The change will be well received locally, as the three heat plan has never been popular in Kentucky. The old three in five plan was best liked until horses began to trot and pace so fast that it was almost cruelty to animals to ask them to race this number of heats.

KNIGHTS OF COLUMBUS IN RELIEF WORK

Organization of committees of women in every town where there are public health service and government-conducted hospitals to provide comforts for disabled former service men was decided upon at a meeting in Kansas City of Knights of Columbus supreme officers department directors and supervisors from every State, it was announced. The meeting was called to plan the expenditure of \$5,000,000 balance of the K. C. war fund.

It is our aim to enroll the mothers and wives and sisters of the men who returned well and whole from the war to aid the thousands who came back with health impaired." William J. McGinley, supreme secretary said.

The Word Metis.

The word Metis, means mixed. It is from the French metis, a derivative of the Latin miscere, to mix. The term was first used in this country by the early French-speaking population of the Northwest to designate persons of mixed white and Indian blood. Among the Spanish-speaking population of the Southwest the word mestizo, of the same derivation, is used, but it applies more especially to those of half white and half Indian blood.

GERMAN WAGES AND PRICES.

German wages at the present time are reported to be about \$5 in gold weekly, or roughly one-half of the prewar normal. German prices in terms of gold seem to be on the average around 20 per cent above the pre-war normal. The German industrial interests seem to have been able to deceive the German workmen with the depreciated German mark, says Wallace's Farmer.

In terms of marks, the German workmen may be getting five or six times what they were before the war, but in terms of what the money will buy, they are getting far less. It is a strange thing that people have come so to worship money that they will allow themselves to be deceived. As long as German money has a fluctuating gold value, it is likely that the United States will find Germany a very hard competitor to beat. With a currency of uncertain value, it is possible to make labor do more work for less return than would otherwise be the case. Germany will eventually pay for the war by the self-denial of her laboring people, a self-denial enforced by a manipulated currency system.

RAILROAD LIGHTS FOR HIGHWAYS ARE FAVERED

Adoption of a uniform three-color signal system on highways, as they are used on railroads, is gaining rapidly throughout the country.

Two hundred cities and towns already have installed this method of notifying motorists of various degrees of danger. Red lights and standards are put up to show first degree danger, such as railroad crossings, dead ends of roads or lift bridges. Yellow lights and markers show second degree danger at curves and grades. Green indicates moving or traffic danger, to be used at road intersections.

Highway officials of New Jersey have approved a bill for adoption of this plan in their State. It also has been approved by the committee on standards of the American Association of State highway officials.

Many national organizations interested in reducing automobile accidents also have expressed their endorsement of this plan.

SIDE LINES IN THE SCHOOLS

The public schools of almost every city in the State are bankrupt for want of funds to keep up with the girls, and some of the school districts are following the customs of the larger cities. A blind man can almost see the cause.

There have been so many side lines introduced into the city schools that the old reliable studies of reading, writing, spelling, arithmetic and grammar have almost been lost sight of. It requires more money to support these side lines, such as domestic science, sewing, expression of thought and action, singing, music, dalcroze, calisthenics, and higher thought, basket ball, lawn tennis, foot ball, and many other athletic sports, than it does the school proper.

It would be much better for the mothers to teach the girls these side lines in the home, and it would help lift a load from the mother's shoulders. The idea in the city is to get rid of the responsibility of teaching the children in their homes, so the parents can attend the movies with regularity. Did you ever attend one of these big schools in the big city and hear a conversation pertaining to studies—it is always some athletic sport, instead of the studies. A child who has been taught these side lines in the home never turns out to be a "mechanical" man or woman, and when they marry you rarely ever find them in the divorce courts.

JUG AND SKELETON FOUND

A drummer, representing a Cincinnati wholesale paper house, was a business visitor in Augusta and told a remarkable tale. The drummer had made a trip to Peebles, Ohio, and while he was there a banker in the town received a telephone message from his son, telling him to come to a certain old brick house. This old brick dwelling, erected in 1820, was used in the early days as a relay station—where horses were changed when the great bulk of the traveling was done by stage coach—was being torn down, and a number of boys were digging around in the cellar of the building. One of the boys came to a flat rock, only a short distance from the top of the ground. After considerable effort the youngsters turned the rock over, and underneath this rock was a complete skeleton of a man, excepting that the skull was missing. Of course, this find started more digging, and under an old fireplace an old-fashioned jug was found, with a corn cob stopper. The jug was opened and its contents gave forth a most pleasing aroma. In fact, it contained the finest whisky the drummer ever sampled. The oldest inhabitant around Peebles have no recollection of the disappearance of any resident of that section.

ASPIRIN

Name "Bayer" on Genuine

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prepared by physicians for twenty-one years and proved safe by millions.

Take no chances with substitutes. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticidester of Salicylicacid. (adv)

MILTON WINS MOTOR RACE AT INDIANAPOLIS

Tommy Milton, driving an American car, won the 500-mile automobile race at Indianapolis, Monday. Roscoe Sarles finished second, three minutes behind Milton. The victory gave Milton \$20,000 for first place and more than \$8,000 in other prizes.

The time was five hours, 34 minutes and 44.65 seconds, an average of 89.66 miles per hour, a new track record for cars of not more than 182 cubic inches piston displacement.

INGROWN TOE NAIL TURNS OUT ITSELF

A noted authority says that a few drops of "Outgro" upon the skin surrounding the ingrown nail reduces inflammation and pain and so toughens the tender, sensitive skin underneath the toe nail, that it can not penetrate the flesh, and the nail naturally turns outward almost overnight.

"Outgro" is a harmless, antiseptic manufactured for chiropodists. However, anyone can buy from the drug store a tiny bottle containing directions.

President Zachary Taylor.

Zachary Taylor is one of the least known of our presidents. He held office only 18 months, but in that time he displayed such courage and strength of character as to endear himself to the people. He came to the office practically unknown and unknowing. His victories in the Mexican war had made him famous, but he was not known to the politicians, nor did he know any of them. He had been called "Old Rough and Ready," but he was not such a blustering, uncouth man as people had thought.

A HELLUVE TIME FOR A FIRE.

In a town in the western part of the State some time ago occurred a fire at about 2 a.m. In this town lives an old man. The usual noise incident to a fire in small towns awakened the old man and he rushed into the street and accosted a passer-by with the exclamation, "This is a helluva time o' night to have a fire." The ridiculousness of the exclamation struck the passer-by and for a long time after the fire was the source of considerable levity on the part of the townspeople. But that is not the point we want to bring out. The point is that a defective fuse, a trash or rubbish pile, an improperly insulated electric wire, a cigar or cigarette butt, a wooden spit-box, in fact none of the usual sources of fires are respecters of hours. They work all the time, but more often their demonstrations are at "a helluva time o' night."

Farm Machinery Imperative.
 While it is impossible to determine the extent that modern farm implements have increased the production per acre, it is certain that it is only through their use that the large increase in population has been supported and sufficient labor liberated to permit of the present manufacturing and commercial activities in our towns and cities, and yet provide sufficient food with which to sustain the race. With the implements in use 60 or 70 years ago, no such condition of development as maintained today is thinkable.

Concerning Baldness.

A majority of men who have amounted to anything have gone bald. To go bald before amounting to anything is the lot of millions. Among those millions are many who feel that the first kingdom of the world would be compensation for loss of hair, even if the perquisites of a king did not include an allowance for a court wigmaker. Even without a crown as a consolation, there is a certain solace in not having to wonder whether your scalplock is standing perpendicularly when the occasion calls for solemnity.—Exchange.

If there is anything in a man, travel will bring it out—particularly ocean travel.

Will incompatibility of politics now be included among grounds for divorce?—Boston Transcript.

DECORATION DAY, 1921

Last Monday was Decoration Day, but we here in Paris hardly realized the significance of the day. Members of Bourbon Post American Legion, decorated graves of their fallen comrades in different parts of the county, and the American flag was displayed at a few patriotic places, otherwise, there was no observation of the day. It was a holiday except for those of us who have to earn our bread by working on days when others are taking a vacation.

It was a day of holy memories, of time-dulled grief in some homes, a day for the reopening of a recent wound in others. In Flanders Field sleep some of the young men whose memories were recalled tenderly Monday. In Federal cemeteries all over the United States, others sleep. Some rest beneath the sod of Cuba and some on the plains of the West, where the daring Custer fought his battles with the Indians.

But, wherever they are, for whatever cause they fought, we gather once a year to honor their memories. And it matters little to us now whether they wore the blue and marched with Grant and Sherman, or were of the gray-clad hosts of Lee and Jackson. North and South, Monday, children scattered flowers over the graves of the soldiers of the Union and the Confederacy impartially. Did not the sons of the South at Santiago, and in the Philippines, at Chateau Thierry and in the Argonne, show what stuff the children of the old South are made of?

"Under the sod and the dew,
 Waiting the judgment day;
 Love and tears for the Blue—
 Tears and love for the Grey."

There is nothing we can do to show the real measure of what we owe to these younger heroes, who entered the holocaust of the world war without thought of self, with a glorious devotion to duty and country unparalleled in the history of the world. But in the hearts of all of us their memory shall ever be green and the stories of their heroism and sacrifice will be told by many an American hearthstone so long as our Republic shall endure.

OPENING OF LATONIA RACES.

Twenty-five thousand persons attended the opening day's racing at the Latonia track Saturday, under clear skies and with cool breezes. The track was dry and fast, notwithstanding the heavy rain of Friday night.

Sands of Pleasure won the Inaugural, with Woodtrap second and Rangoon third. Time, 1:45; distance, one and one-sixteenth miles. This race was worth \$6,095 to the winner.

In the Clipetta Stakes, Fair Phantom was first, Miss Joy second, and Dream of Allah third. Time 59 4/5 seconds. Distance five furlongs.

The Inaugural and the Clipetta, the principal events of the day, were not marred by withdrawals, only Busy Signal and Sway being scattered in the former event.

The Clipetta Stake paid the winner \$6,575.

Only one favorite won, that being the Jones entry, in the Clipetta Stake. All the other winners paid liberal prices.

SENT TO CHILDREN'S HOME

The Nicholas County Court appropriated money to be used for paying the expenses of transportation of the six children of Zora Sosby to the Kentucky Children's Home at Louisville. Several days ago an order was made in the County Court surrendering the children to the Home. The next day the father of the children agreed to care for them, and moved to Paris. Later the county authorities of Bourbon County notified the Nicholas county authorities that the children were in Paris in destitute circumstances and asked that some action be taken in the matter. The Bourbon authorities were authorized to take the children to the Home, which was done.

THE NEW HOWARD STORE AT CARLISLE

(Carlisle Mercury)

Two stores in Carlisle have opened under new management. The Howard Hardware Company, composed of William Howard, of Richmond, Ky., and Logan Howard, of Paris, assumed charge of the building of Mr. Harry King on West Main street. The name for the firm has not been definitely settled, but in all probability it will continue under the name of the Howard Hardware Company.

The new firm will equip their store with an entirely new stock of goods. The present firm of the Howard Hardware Company doing business in the building will move their stock to the Walden building. The store will be in charge of Mr. Wm. Howard, Sr., of Richmond. Mr. Howard is a hardware man of life-long experience. For over 31 years he was salesman for the International Harvester Company, and brings to the store a complete knowledge of the hardware business. Mr. Logan Howard, well-known Paris merchant, will also be connected with the store.

AUTOIST PROTESTS TOO MUCH OIL ON STREETS.

Paris, Ky., June 6.

ED. THE NEWS:

In some towns of Kentucky they have tried to make a law against such excessive oiling of streets, where it stands in puddles, such as on the streets of Paris, where hundreds of automobiles have to travel daily. Besides being ruinous to tires and paint of autos, it causes dangerous skidding. I have no objection to retarding the dust, but if this tar oil was spread on in a more moderate form and a light coat of sand spread over the top it would serve the purpose just as well, or even better, and without so much strife to traffic and pedestrians.

AN AUTOIST.

Fire, Wind and Lightning Insurance.

THOMAS, WOODFORD & BRYAN

A DISTINGUISHED SOLDIER

The importance of the interview with Col. H. C. Whitehead, which appeared in Friday's issue of THE NEWS, prompts some notations about the Colonel himself.

An officer of wide and varied experience, Colonel Whitehead has specialized on the subjects of cavalry remounts, and the care of the marching soldier's feet; and he was for two years before the last war the accredited representative of the United States Government, attached to the German Staff, in order that our army might profit by the investigations of so eminent an authority on these two lines of research.

It is perhaps not generally known even to Kentuckians that Colonel Whitehead's office in Lexington is the headquarters, or main office, of the United States Army Recount Association. The significance of this choice of location is apparent. Kentucky, the home of the thoroughbred, is the logical headquarters of a national organization devoted to the improvement of the country's supply of horses by means of the introduction of the potent thoroughbred strain.

Y. M. C. A. NOTES

The following swimming schedule has been adopted for the summer at the Y. M. C. A., effective yesterday:

Younger boys, ten to thirteen, Monday and Wednesday, 2:30 p. m. and Saturday, 10:00 a. m.; midgets, fourteen to sixteen, Monday, Wednesday and Friday, 4:00 p. m.; business and professional men, Monday, Wednesday and Friday, 5:00 p. m.; employed boys, daily, 7:30 p. m. except Tuesday and Thursday; young men, daily, 8:00 p. m. except Tuesday and Thursday; girls, Tuesday and Friday, 10:00 a. m.; women, Tuesday and Thursday, 7:30 p. m.

Much interest is being shown in swimming at the Association this season, as the swimming committee is planning several exhibitions and contests in addition to the regular instruction classes. A special award is made to those who learn to swim. Last summer a large number of boys and girls learned.

JOHN SHUFF TO LECTURE HERE

JUNE 14.

Word was received late yesterday afternoon that John M. Shuff, of Cincinnati, one of the foremost lecturers on community subjects in the Middle West, had consented to make an address in Paris on the evening of Tuesday, June 14. Mr. Shuff who is manager of the Union Central Life Insurance Co., of Cincinnati, was procured through the efforts of Dr. M. H. Dailey, president of the local Community Service organization, and Miss Kate Alexander, local manager of the insurance company.

Mr. Shuff has a large acquaintance in Bourbon county, having been born here and having resided here for some years. He is at the head of several charitable organizations at Cincinnati, and gives a large part of his time to promoting community interests throughout Ohio, Kentucky and other States. He will have a message of particular interest to the people of this city and county, and

playgrounds development contemplated here. In addition to the address of Mr. Shuff, an interesting program will be arranged, including musical numbers. Details as to place of meeting and other arrangements will be announced later.

JUNE COURT DAY.

Yesterday was probably the tamest and most uninteresting "Court Day" Paris has had since the inauguration of that time-honored institution. There was only a small crowd in the city, and little livestock on the market, a few mules and horses constituting the bulk of the offerings. Merchants reported business slow and collections slower. Farmers are so busy that they did not take the time to quit their work to come to town for "Court Day." Candidates for the various offices were busy interviewing the few voters who ventured within their reach. By three o'clock the crowd had entirely vanished, leaving only a few stragglers on the "square."

FIRE CHIEF SOUNDS WARNING.

Earl McCracken, Chief of the Paris Fire Department, requests all persons using coal oil or gasoline stoves to exercise proper caution in handling them, so as to avoid danger from fires by explosion. A few days ago ten houses in Claysville, colored suburb of Paris, were destroyed by fire, which originated through the explosion of a gasoline stove.

Friday afternoon the fire department was called to Lylesville, another colored suburb, where the explosion of a coal oil stove set fire to a cottage occupied by John R. Mitchell, a colored man. The damage was slight.

CONFEDERATE MEMORIAL EXERCISES.

Simple but impressive ceremonies Friday afternoon at the Paris Cemetery marked the annual observance of Confederate Memorial Day by the Richard Hawes Chapter, Daughters of Confederacy, and members of John H. Morgan Camp, U. C. V., of Paris. The day was also the birthday anniversary of Jefferson Davis, president of the Confederacy.

Lieut. Lot D. Young, of Paris, was the principal speaker of the occasion, his address being one of rare oratorical excellence. The roll call for the year followed, showing five Confederates had passed over the Great Divide during the year. Graves of Confederate soldiers were decorated with flags and flowers. "Taps" were sounded by Wm. M. Talbott, and echoed by a bugler from another part of the grounds. The exercises were conducted at the Confederate monument.

NOTES FROM BASEBALL, THE NATIONAL GAME

A large crowd at the Second street park Sunday afternoon saw the Paris Ruggles team win from the Mammoth Garage team of Lexington, in a hotly contested game by a score of 3 to 2. Both teams fought every inch of the struggle, which see-sawed until Paris put over the winning run in the last inning.

The day was an ideal one for the game, being warm and bright, with just enough breeze to make the day an enjoyable one. The principal features of the game were the pitching by Caproni and Cooper, neither one issued a pass to first, and the home run by Mann, of the Paris team, which won the game for Paris in the final half of the ninth inning.

Three base hits were made by Berryman and Brewsbaugh, of the Paris team.

Batteries—Lexington: Cooper and Berryman; Paris: Caproni and Berryman.

Not only the national credit, but the national credibility, is abounding. —Columbus Record.

BOURBON HORSES IN SARATOGA WOMEN HELP REBUILD THEODORE ROOSEVELT HOME.

The sales of the thoroughbred yearlings from the great stock farms of New York, New Jersey, Maryland, Virginia, Kentucky, Tennessee and California, the proprietors of which breed for the public market, will be an appealing feature of the Saratoga August session of racing this season.

The great producers who have been assigned dates for sales by the Fasig-Tipton Company are Edward F. Simms, Miss Elizabeth Dangerfield, Chas. H. Berryman, the Baldwyn Stud, Williams & Radford, White & Garnett, Henry T. Oxnard; William Woodward, Kenneth D. Alexander, John H. Morris, Senator Johnson N. Camden, Capt. Philip M. Walker, the Hillyard Stud, Arthur B. Hancock, A. K. Macomber, Charlton Clay, W. W. Darden, Hal Price Headley, William B. Miller, Willis Sharpe Kilmer, etc. Other producers will arrange for dates between this and August 1.

Mr. Simms, importer of the \$250,000 Prince Palatine and the \$100,000 Negro, will offer the produce of his newly organized Xalapa Stud, now one of the most considerable thoroughbred nurseries of Kentucky's fabled Blue Grass country. Mr. Hancock was the breeder at Ellerslie and Claiborne, the former Virginia's oldest thoroughbred nursery, the latter a comparatively new establishment near Paris, of Baze, winner last season of the Maryland Handicap and the Laurel Stakes and this year of the Excelsior Handicap; also of Careful, winner of the Pimlico Oaks, Billy McLaughlin, Knobble, Constance, Cleopatra, winner of the second Latonia championship, Dunboyne, winner of the Futurity of a couple of seasons back.

Great Secret.

A business concern in Boston has this pungent maxim prominently displayed in its front window: "A completed transaction is an asset; unfinished business is a liability." A modern efficiency expert could write a 50,000-word book on that text, and then really not say much more. The world is full of "starters" who never get anywhere. The big idea is to choose only worth while objectives and then finish what you start.—Albert Sidney Gregg.

At a luncheon given by Mrs. Douglas Robinson, sister of Theodore Roosevelt, to a large number of prominent club women, it was determined to make a concentrated effort by club women to assist the Woman's Roosevelt Memorial Association, of 1 East 57th street, to complete at once the restoration of Roosevelt House, the birthplace of Theodore Roosevelt.

Said Mrs. Thomas G. Winter, President of the National Federation of Women's Clubs, comprising over two million women, "I commend this movement to the General Federation and hope that each of its members will join the Woman's Roosevelt Memorial Association. Millions of American women should be glad to contribute each a little to keep as a memorial of their eminent friend the birthplace of Theodore Roosevelt."

The corner-stone of Roosevelt House was laid in January last by Major General Leonard Wood. The structure itself will incorporate much of the material of the old Roosevelt mansion, which is now to be accurately reproduced. When finished, it will contain the bedstead in which Theodore Roosevelt was born, together with other of the original furnishings, now in possession of the Roosevelt family. About \$150,000 additional is needed for the work of reconstruction.

Calling in Cairo.
Englishmen who do not know Cairo sometimes take houses in remote and undesirable parts of the city. In "Egypt as We Know It" Mrs. E. L. Boucher amusingly describes how hard it is to find a person who has thus gone astray. Her husband, she says, wrote to a doctor for the address of some friends whom she knew he had attended. Here is the doctor's answer: "The M—'s live in a house without a number in a street without a name next door to an Armenian butcher who, I think, has no sign, west of Abdin palace! The staircase has eighty-seven steps."

English Titles of Nobility.
The rank of earl was introduced into England at the time of the Conquest and succeeded the Saxon earldom. It continued the highest rank in England until Edward III created dukes in 1337 and Richard II created marquesses in 1385, both being superior to earls.

Safeguarding the Miner.
To protect the miner against his ancient enemy, inflammable gas a mining engineer has improved the standard type of miner's lamp. He has added a device which causes the lamp to emit a loud singing note as soon as the atmosphere becomes charged with inflammable gas.

No Room for the Incompetent.
Much of the work done in this world has to be undone. Incompetency is the greatest drawback to progress. Incompetents are the most costly members of society, and always will be. That's why there is always a premium on brains and skill, which combine to produce efficiency.—Exchange.

COBBLER CLOSE TO COOLIDGE

Town Shoe Repairer, "Friend, Philosopher and Guide" of Vice President.

HELPS TO SHAPE HIS CAREER

Friendship Began in College Days Continues Through Early Struggles and Subsequent Prominence in Politics.

Northampton, Mass.—James Lucey, mender of shoes, is pegging away in his shop here with one eye on the newspapers for word of how the national capital treats Calvin Coolidge, his one-time associate in local politics, and now vice president.

When Vice President Coolidge, just before departing for Washington recently, grasped the cobbler's hand as the photographers snapped their cameras, he gave him a distinction that he was asked to explain. "Put Mr. Lucey down as my guide, philosopher and friend," he said. "And so the cobbler is now nationally known."

What the vice president meant was more or less well known to Northampton folk. The story goes back to the days when Calvin Coolidge was a sophomore at Amherst college. With shoes to be repaired he sought Lucey's shop on Gothic street in this city, and then remained to listen to the cobbler's homely comments on the topics of the day.

Helped to Shape Career.

The student found the shoemaker's philosophy so engaging that during the remainder of his college course he went frequently to see him. As a lawyer later young Coolidge opened offices here, and while he waited for clients, continued his acquaintance with the cobbler. Throughout his career in the politics of the city and state, Mr. Coolidge dropped in at the shoe shop from time to time to exchange ideas with his friend and have the benefit of the latter's pointed political observations.

The youthful Coolidge took away lessons from the cobbler's counsellor; Coolidge, the candidate, received the benefit of his influence, which was considerable in city politics, and when he rose to a position of state and national prominence he still received the loyal support of the shoe man.

Mr. Lucey, modestly explaining that Mr. Coolidge long since passed out of his range of influence, admits that he may have been of some help when the vice president was on the first rungs of the political ladder.

Cement Closer Friendship.

The cobbler says that the only time he ever crossed Calvin Coolidge seemed to make firmer the friendship between them. Mr. Coolidge had sought the election of a friend as mayor, and asked Mr. Lucey as a delegate to the party caucus to stand in his behalf, but the cobbler, already bound to the opposing candidate, refused. This evidence of loyalty to a prior allegiance served to heighten their mutual respect.

The shoemaker, a native of Ireland, came to Northampton forty years ago at the age of twelve. A family of eight children, seven of whom are now living, has made demands on his earning ability. Five are girls, one is a stenographer, two are teachers, a fourth, who was formerly a teacher, is now married and one is a clerk. Of the two boys one is a graduate of Holy Cross college, and the other is a student in the Northampton Commercial college.

Washington.—Motor cars registered in the United States last year numbered 9,211,295, an increase of 1,645,849 over the preceding year of 22 per cent, the bureau of public roads announced.

The registration and license fees amounted to \$102,034,106.

In New York state alone the number of cars registered in 1920 exceeded the total registration for the United States in 1910, and the revenue derived in that state from this source was about equal to the entire registration revenues of the United States in 1918. Ninety-six per cent of the 1920 revenue was applied to road maintenance or construction.

Water-Finder Finds Minerals.
A reader in Dorset, Vt., writes that he is a water-finder. He uses a forked stick but can not explain what power causes it to point downward when he is passing over water. Not only can he locate water, but by placing a small piece of lead in the end of the stick he is able to find lead when under the ground, once locating a buried pipe for a farmer. He can also locate copper—Montreal Herald.

MANY INDUSTRIES TIED TO TOBACCO

Prohibition of Weed Would Mean Big Financial Loss to Allied Trades.

WHO USES THE MATCH?

The Smoker Mainly—Also Responsible for Spending Hundreds of Millions Annually for Licorice, Sugar, Coal, Cigar Boxes, Tin, Fall, Etc.

By GARRET SMITH

"Got a match?" How many times a day is that question asked in these United States? How many more times in the question unnecessary because most pockets are kept well supplied with the useful little article? Anyhow, inasmuch as it is estimated that there are 30,000,000 tobacco users in the country, we would guess that the answer to that question would run into the hundreds of millions.

For if it weren't for the smokers in these days of electric lights how many matches would be used? A pretty small proportion of the number of these "sticks of blazes" produced in the country every year. Abolish tobacco and the match business would be shot to pieces.

But the match business is only one of a dozen or more allied industries which derive large revenues directly or indirectly from the tobacco trade and would suffer heavily if national prohibition of tobacco were to go into effect as some of our reformers would have it. The annual sales of tobacco products, based on retail prices, is estimated at \$1,887,000,000. Of the cost of producing and selling this quantity of cigars, cigarettes and other forms of the weed, some hundreds of millions of dollars are paid out for other things than the raw tobacco and labor of making it up.

\$25,000,000 a Year for Boxes

For example, the tobacco trade consumes each year 45,000,000 pounds of licorice, 50,000,000 pounds of sugar, both used in flavoring tobacco, and 650,000 tons of coal. It is estimated that the value of wooden cigar boxes used is \$25,000,000 a year, quite an item to the lumber business and to manufacturers of the boxes.

In making these boxes 550,000 pounds of nails are employed. Other large items used in making and preparing tobacco for sale are the tin and lead foil, paper for bags and cigarette wrappers, cloth for tobacco bags, labels, coupons, etc., involving the printing trade extensively.

Then building contractors and manufacturers of machinery are largely interested. Investments in plants and machinery employed in manufacturing tobacco are estimated at \$102,000,000. Replacement, up-keep and interest on the investment make no small sum annually.

And let reality men note there are approximately 325,000 tobacco farms in the country, with a total estimated valuation of \$180,000,000. Of further interest to real estate men is the fact that there are 700,000 retail establishments selling tobacco, involving a total rental and up-keep impossible to estimate, besides the large amount of office space occupied by administrative branches of the general business.

The insurance men, too, have their share of the pickings. The tobacco business pays out annually \$7,000,000 in premiums in the United States.

And there are the railroads who reap revenue from 2,210,000 tons of tobacco products every year.

As for the advertising business, here again it is impossible to form any estimate of the enormous annual outlay.

The prohibition of tobacco would also knock a good-sized hole in the receipts of the United States government. The internal revenue receipts from tobacco for the fiscal year 1920 amounted to \$295,809,355.44. Customs duties provided an additional \$25,000,000 in round figures, making the total revenue return to the government \$320,000,000.

Influence on Popular Sentiment

It is this interlocking of the tobacco business with so many other interests and the vast amount of financial loss that would be involved in the abolition of tobacco that is one of the most serious aspects of the proposal to prohibit the sale of tobacco, a proposal, however, which has little support by public sentiment if the newspaper editors of the country are correct in their estimate of that sentiment.

In a poll of the editors made recently by the Tobacco Merchants' Association of the United States through the Press Service Company of New York City, 95 per cent of the 7,847 editors who replied expressed the opinion that the people of their communities were opposed to any law against tobacco. As these editors represent some 80,000,000 readers the results form a pretty general test of national opinion.

In their remarks accompanying their replies many of the editors expressed

it as their opinion that the opposition of their communities to the abolition of tobacco was based to some extent at least on the damage such a change would do to the business interests of the community. This was particularly true in the tobacco growing states and centers where there were large tobacco plants.

But when the extent of the business involved in the allied interests of the tobacco trade is considered, as above briefly outlined, it is clear, that there is hardly a section of the country that would not be affected directly or indirectly by abolishing tobacco.

POLICEMAN NOW GIVES OUT FACTS

Says Tanlac Enabled Him To Pass Examination With Rating A-1 And He Now Feels Great

"I never paid out money to better advantage in my life than when I got Tanlac, for it has restored my health and built me up fifteen pounds in weight, besides," said Frank J. Hebbler, patrolman on the Covington, Ky., police force and living at 513 Bakewell street.

"For a long time past," he continued, "I had not been in the best of health, and last spring I started all of a sudden to going down hill. What I ate didn't seem to do me a bit of good. After meals I bloated up so tight with gas I could hardly stand the pressure of my belt around my waist. I was on night duty, and my legs hurt so it was difficult for me to get around in patrolling my beat.

"My nerve went all to pieces and I usually went home all tired out and never got any sleep—just dozed by fits and starts and got up feeling worse than if I hadn't gone to bed at all.

"But Tanlac has just knocked out all these troubles and got me to feeling like a new man. Since taking it I can enjoy my food and it does me good. I sleep like a log and am in tip-top condition in every way. I recently underwent the regular re-examination for the police force and passed physically with a rating of A-1, which I never could have done in the shape I was in before I took Tanlac."

"Rare" Ben's Epitaph.

Not only is Ben Jonson's epitaph in the Abbey, "O rare Ben Jonson," one of the simplest ever composed, but it is said to have cost no more than eighteenpence. The stone over his resting-place was originally quite bare, and an admirer of the dramatist, as a personal tribute, paid a mason 1s. 6d. (36 cents) to cut the four words on the stone. The author of this simple epitaph was probably Sir William Davenant, who succeeded Jonson as Poet Laureate, and was also buried in Poet's Corner, with a similar inscription on his tombstone, "O rare Sir William Davenant."

Early-Day Peddler.

An important merchant of centuries ago was the man who did your buying for you. In those days there were no mail-order houses nor was there such a thing as running into town to do your shopping. So there was evolved a professional shopper who made it his business to buy what you needed. He was known as a packer, packer, or pake-man, and from these words the modern names resembling them have sprung.

CORN

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation. (adv.)

Curiosity and Study.

Curiosity is passion very favorable to the love of study, and a passion very susceptible of increase by cultivation. Sound travels so many feet a second, and light travels so many feet in second. Nothing more probable; but you do not care how light and sound travel.

Very likely; but make yourself care; get up, shake yourself well, pretend to care; make believe to care, and very soon you will care. I am sure that a man ought to read as he would grasp a nettle; do it lightly and you are maled; grasp it with all your strength and you feel none of its asperities.

Hall's Catarrh Medicine.

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while

MILLERSBURG

DEATHS.

SHANKS.

The body of Luther Clyde Shanks, world-war victim, was shipped from Hoboken, New Jersey, Sunday and arrived in Louisville last night. The body, accompanied by a U. S. Army representative, will be brought to Paris probably to-night, according to Undertaker George R. Davis, of Paris, who received a telegram yesterday morning from the U. S. Graves Registration Bureau at Hoboken, stating the body had been shipped.

The funeral will be held at three o'clock Sunday afternoon, with services conducted by Rev. C. H. Greer, pastor of the Paris Methodist church. The committal exercises at the grave will be under auspices of Bourbon Post, American Legion, which will pay full military honors.

DOTY.

McKee Doty, aged thirty-eight, a former resident of Paris, died in St. Elizabeth's Hospital, in Covington, Saturday night, after an illness of but a few hours, due to an attack of heart trouble. Mr. Doty had been a resident of Covington about fourteen years.

He was a son of William and Calie Current Doty, both pioneer residents of Paris. Several years ago he was married to Miss Maude Clark, of Paris, a niece of W. J. Huffman, former Parisian, now also a resident of Covington, who survives him. Mr. Doty is survived by three brothers, John James and Edward Doty, of Paris, and four sisters, Mrs. Jas. McNamara, Sr., Mrs. Henry Shout, of Paris, Mrs. Henry Bolling, of Millersburg, and Mrs. James Gilmore, of Covington.

The body was brought to Paris, Sunday night and taken to the home of Mr. and Mrs. James McNamara, on Pleasant street. The funeral cortège left at 3:00 o'clock yesterday afternoon for Millersburg, where the interment took place in the Millersburg Cemetery at four o'clock with services conducted by Rev. W. J. Slater, pastor of the Christian church. The pall-bearers were Jas. McNamara, Russell Doty, Bryant Doty, Raymond Bolling and Elmer Doty and John A. McNamara.

TOBIN.

Following an illness extending over a period of several years, during which she had been confined to her bed, Mrs. Mary Tobin, aged eighty-eight, died at her home on Second street, Friday night. Mrs. Tobin had been an invalid for over ten years, being confined to her bed for seven years, though tenderly cared for by her daughters, Mrs. John Shine and Miss Rose Tobin.

Mrs. Tobin was a native of Ireland, coming to America when she was quite young. She was the widow of John Tobin, who for many years conducted a nursery and orchard business on the Winchester pike, near Paris.

Besides her two daughters, Mrs. John Shine and Miss Rose Tobin, both of Paris, she is survived by one son, Thomas Tobin, of Bourbon county.

The funeral was held yesterday morning at nine o'clock at the Church of the Annunciation with services conducted by Rev. Father William O'Hare. The interment followed on the family lot in the Catholic Cemetery. The pall-bearers were Dr. F. P. Campbell, Murray Higgins, Ed. Burke, J. W. Payne, Ed. H. Gory and Dr. A. H. Keller.

MATRIMONIAL.

The following announcements have been issued:

Mr. and Mrs. Lewellyn Cantrell announce the marriage of their daughter, Marion, to Mr. Shelby Moores, on May 25th, 1921, Jeffersonville, Indiana.

The following handsomely-engraved invitations have been issued:

Mr. and Mrs. John T. Collins request the honor of your presence at the marriage of their daughter, Sarah Mildred, to

Mr. Stanley Smith Dickson on Thursday, the sixteenth of June Nineteen hundred and twenty-one at eight o'clock Christian Church, North Middletown, Ky.

SAUNDERS—JUDY

The following invitations have been issued:

Mr. and Mrs. M. C. Saunders request the honor of your presence at the marriage of their daughter, Mary Mona, to Mr. Howard Current Judy, on Wednesday, June nineteenth, one thousand nine hundred and twenty-one at eight o'clock, Eight Hundred Main Street, East, Lexington, Kentucky.

Both the bride-elect and prospective groom are former residents of Millersburg, and are well-known in Paris. Several delightful social functions have been given in their honor recently.

NIXON—HALL.

Fithian Hall, a former resident of Bourbon county, who has been residing on his farm near Lancaster, Ohio, for the past four years, was married on June 1, at Wilmington, Ohio, to Mrs. Cora Nixon, of Lancaster, to whom he had been engaged for some time. Mr. and Mrs. Hall, after a short wedding trip, returned to Lancaster, and will make their home on the groom's farm.

Mr. Hall was one of the best-known young farmers in Bourbon county, and is the son of John Hall, who resided in the Kiserian vicinity for many years. His bride is a handsome and charming young woman. THE NEWS extends congratulations and best wishes to Mr. Hall and his fair bride.

Lexington.

THE TOBACCO CROP.

Hot, dry weather recently experi-
enced throughout the county has en-
couraged the growth of the plants
and prevented the spread of "wild-
fire," according to well-informed
growers. Plants already infected
have produced new leaves, which
have grown out clean and free from
the disease, and no great amount of
spread of the trouble has been re-
ported. Even though the plants ap-
pear disease-free in the beds, the
planting of them in the field will
carry the disease, according to the
authorities, who state that the infec-
tion is carried on the lower leaves,
which were produced in the early
stages of growth.
